Merios

FOR LONGEVITY AND EXECUTIVE HEALTH PROGRAMS · GULF, OCT 2026

FOUNDING PROGRAM · 3 SLOTS

The companion your members keep between two check-ups.

Merios turns blood results from any lab, sleep, stress and activity into one personal baseline, explained in plain language. It keeps members engaged from the assessment day to the repeat lab, and brings them back to you with better questions.

150+
blood biomarkers tracked over time, from any lab

4 signals
blood from any lab; sleep, stress, activity from Apple Health

0 IT
integration needed to start a pilot

0
individual records shared with your organisation

THE GAP IN EVERY GREAT PROGRAM

A longevity or executive health program delivers an exceptional assessment day. Then comes the quiet stretch: 8 to 12 weeks until the repeat lab, a PDF that gets lost, and no link between the bloodwork and how the member sleeps, trains and recovers. Engagement tends to drop first; repeat labs and renewals follow.

WHAT YOUR MEMBERS GET

- **One personal baseline:** biomarkers tracked visit after visit, next to sleep, recovery, stress and activity. Their normal, not a population average.
- **Correlations, not just numbers:** how a month of short nights or a heavy training block shows up in their markers.
- **Plain-language education:** descriptive and calm, never alarming, never prescriptive.
- **Theirs to share:** members can export their data and bring it to your clinicians.

WHAT YOUR PROGRAM GETS

- **Your name and milestones** (for example the week-12 repeat lab): we build that version of the member experience during the pilot.
- **Engagement between visits,** as aggregated, anonymous metrics: activation, weekly actives, repeat-lab adherence, satisfaction.
- **A simple start:** in the pilot, each member receives an access code and imports their own results. Your organisation transmits nothing.

WHY MERIOS

Merios grew out of its founder's PharmD research thesis on blood biomarkers for preventive medicine: weak signals mean little alone, and start to make sense read together. Live on the App Store (iOS), in English and French; Arabic is next.

FOUNDING PROGRAM

Three Gulf slots, founder terms.

90 days
pilot, up to 50 members

AED 18,000
paid upfront, kickoff within 14 days

100% credited
to the year-one licence

50% off
the year-one licence list price

4 metrics
success criteria agreed in writing

Roadmap
a direct line into the product

CLEAR LINES

- General wellness product: no diagnosis, no alerts on critical values, no treatment advice, no clinician dashboard.
- It complements your clinicians; it never replaces them.
- Patient-held: members own their data and give explicit, specific consent. Encrypted in transit and at rest.
- In-region hosting can be set up for integrated deployments, under contract.

NOT INTENDED FOR MEDICAL PURPOSES

غير مخصص للأغراض الطبية
